Listing of Claims:

1-17 (cancelled)

18. (currently amended) A method of simulating a missile by means of a missile simulator during testing of an aircraft which includes a weapon system for controlling missiles with which the aircraft may be equipped, the method comprising:

i) generating a target seeker command position for a target seeker in the missile, whereby the target seeker is commanded to adopt a predetermined position;

ii) receiving the target seeker command position at the weapon system;

~~ii) iii)~~ iii) simulating the behavior of the missile in a computer model to generate an actual value signal adapted to the weapon ~~systems~~ system;

~~iii) iv)~~ iv) generating in the weapon system a trouble signal from a deviation between the target seeker command position and the actual value signal;

~~iv) v)~~ v) using the trouble signal as a control signal for the target seeker; and

~~v) vi)~~ vi) repeating steps ~~ii) — iv)~~ iii) - v).

19. (previously presented) The method in accordance with claim 18, wherein the trouble signal is measured continuously and wherein sampled values for a vector indicating error in amplitude (A) and error in phase angle (ϕ), which represent a difference between a vector S^C corresponding to the target seeker command position and a vector S_O corresponding to the actual value signal,

are determined and sent to the computer model in the missile simulator.

20. (previously presented) The method in accordance with claim 19, wherein for each trouble signal, the computer model determines a corresponding actual value signal.

21. (previously presented) The method in accordance with claim 20, wherein for each trouble signal the computer model determines a new vector S^C including an amplitude and a phase angle of the new target seeker command position.

22. (previously presented) The method in accordance with claim 20, wherein a time-continuous actual value signal is reproduced from a time-discrete vector from the computer model.

Attorney Docket No. 19391.0011

The undersigned authorizes the Commissioner to charge insufficient fees and credit overpayment associated with this communication to Deposit Account No. 19-5127, 19391.0011.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Michael A. Schwartz". The signature is fluid and cursive, with the first name "Michael" and last name "Schwartz" clearly distinguishable.

Date: September 29, 2004
